2018 Water Main Improvements

The construction of new water main and water services **has begun this week**. The streets impacted by our work are as follows:

- Norfolk Road from Arthur Avenue west to Indian Drive.
- Arthur Avenue from Burlington Avenue north to Chicago Avenue.
- Tuttle Avenue from Burlington Avenue north to Chicago Avenue.

The project calls for replacing water main and water services on these streets and is expected to take until June 1st to complete. The water main work will start on Arthur and then move to Norfolk and finish up along Tuttle. The construction of the new water main including testing will take approximately 4 weeks. After the construction of the new water main they will begin construction of the new water services on these same streets. The water service work is expected to take another month. After that the contractor will complete identified drainage improvements along both Arthur and Tuttle Avenue and the small section of Norfolk (Arthur to Indian) in May. A separate and different contract, 2018 Street Improvements will construct the new streets, driveway aprons and parkway restoration along these same streets, but the Street Program will not start until May 14th.

Road closures will be in place during construction along the streets we are working on each work day from 7:00am to 5:00pm. **We anticipate completing the water main project by June 1st.**

This work requires us to restrict the affected streets to be “No Parking” on both sides while the water main work is ongoing on that specific street. Temporary “No Parking” signs will be posted where needed and we ask for your cooperation to park elsewhere. We ask the affected residents to inform their visitors, contractors, landscapers, nannies, cleaning services, etc. to park in your driveways or on adjacent streets during active construction on your block. Temporary Road Closed signs may be set up at each end of our construction zone to detour through traffic around the active construction zone.

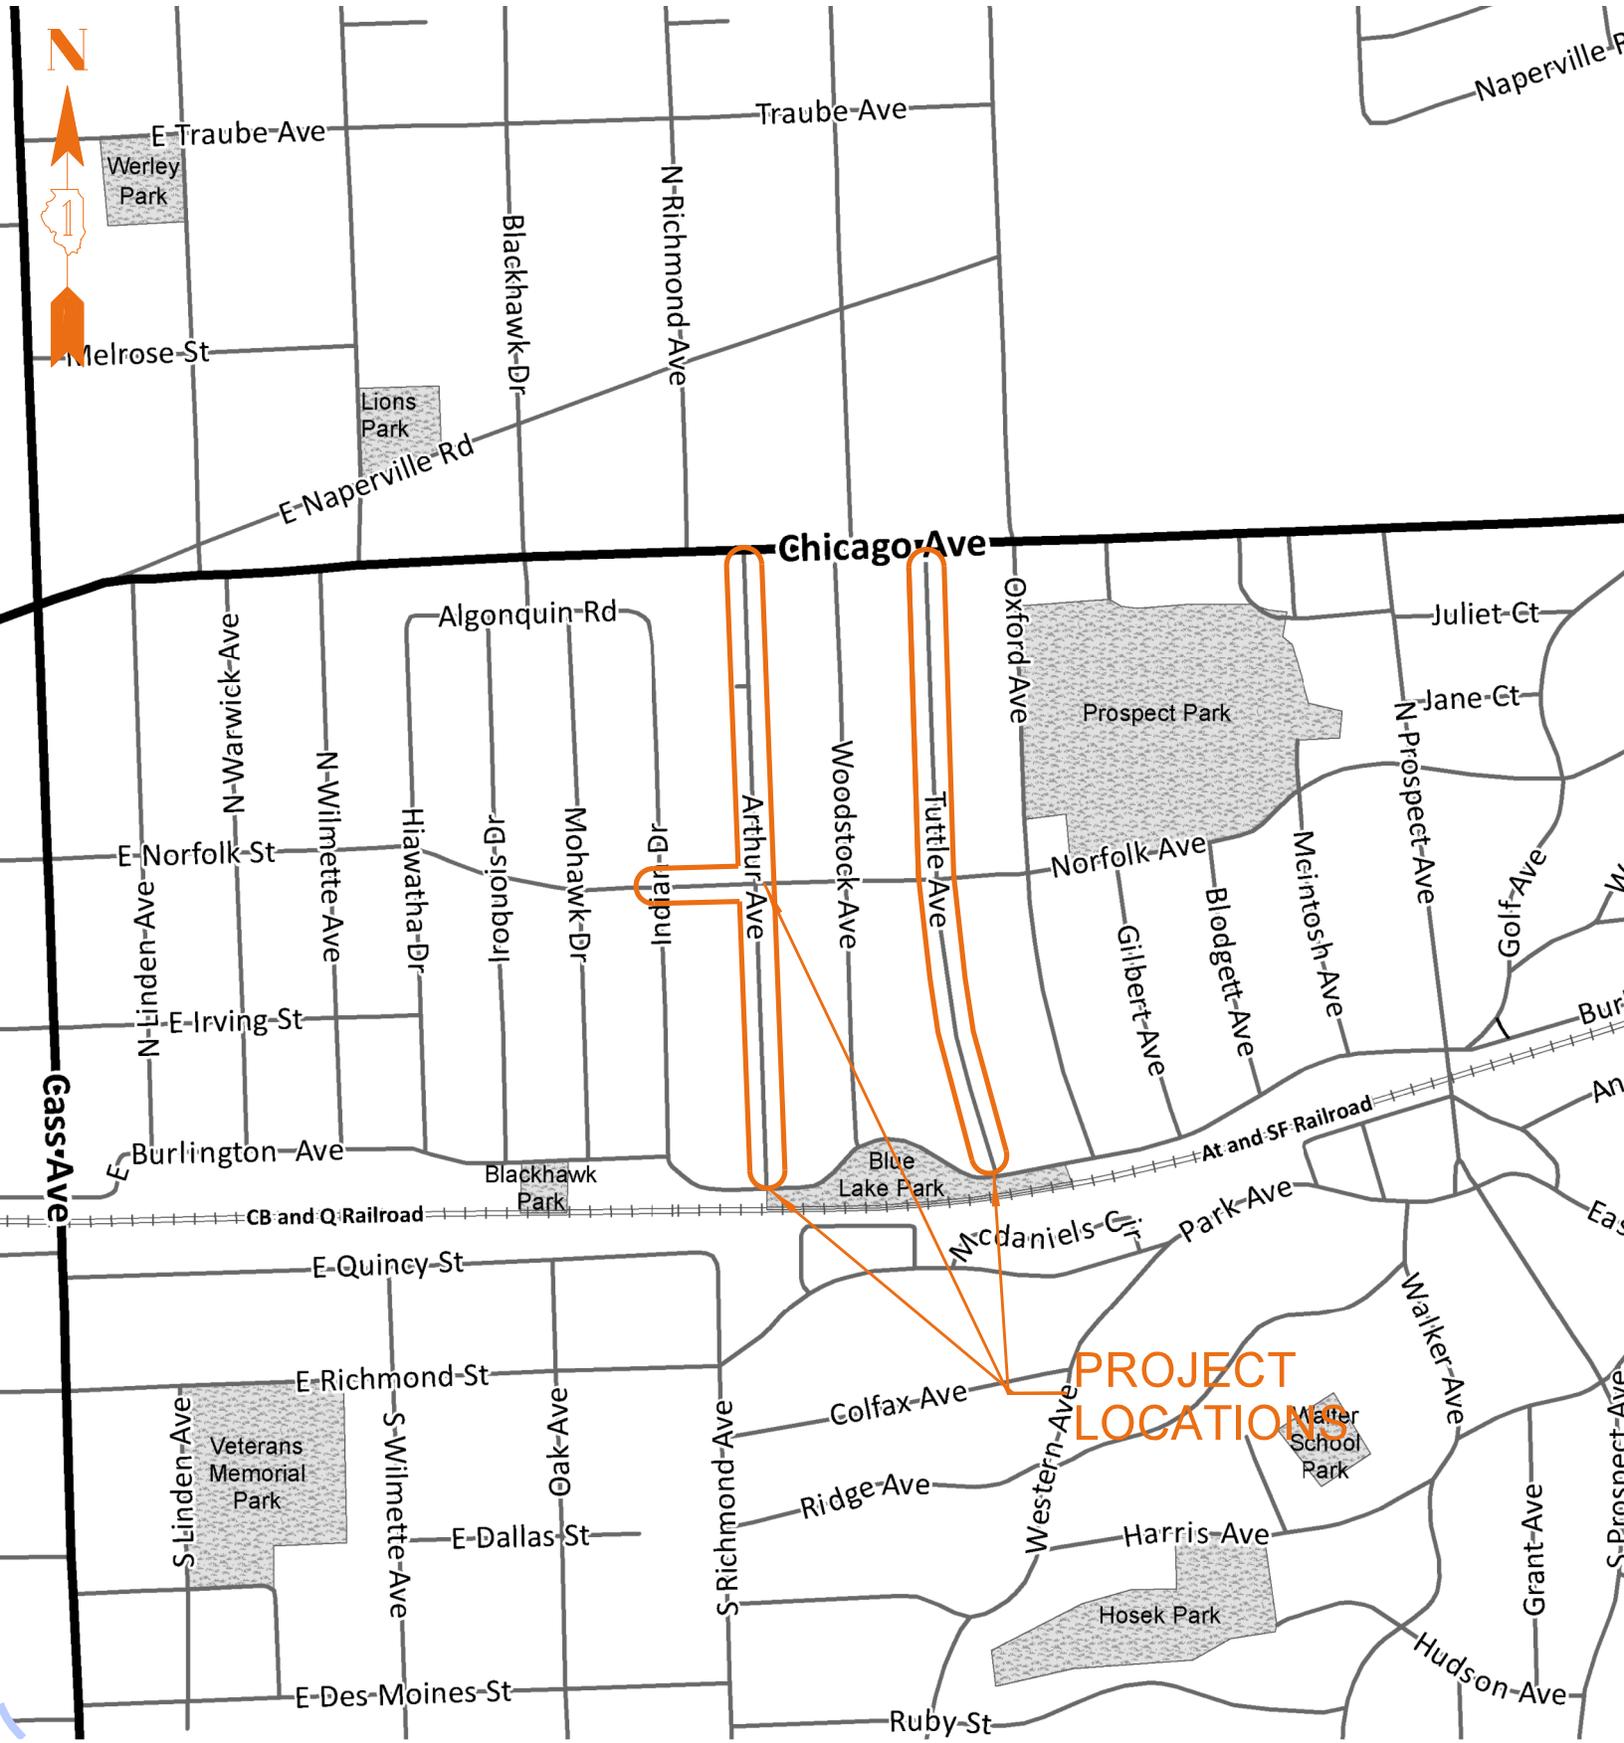

Your cooperation during construction is greatly appreciated. Typical construction work hours will be 7:00am to 5:00pm on Monday through Friday. Saturday work may be approved on a case by case basis by the Village depending on weather and progress. We will notify the bus company and the trash company of our active construction zones and we will coordinate with them to get your trash picked up on Tuesdays. We need dry weather conditions for our schedule to be met. Rainy days will likely push the schedule back.

If you have any questions please contact our on-site engineer Bill Sprague at 224-315-0201 or you can call Public Works at 630-286-4750 between the hours of 7:00am to 3:30PM. After hours, please call 911 in the event of any emergencies.

Residents interested in updates via email should email pnickell@clarendonhills.us and state they would like to be added to the SSA31 contact list. Please note the 2018 Road Improvement Program - SSA31 web page has been setup @ www.clarendonhills.us/SSA31.

Thank you for your cooperation and understanding.

Michael D. Millette, P.E.,
Director of Public Works
