From: Brendan McLaughlin, Public Works Director
Date: October 14, 2022
Subject: Weekly Report

1. The new water main installed on Eastern between Ann and Park was placed in service this week and the old main was physically disconnected from the system. The Village is awaiting a report from the environmental engineer on the status of their cleanup and next steps, including their date for road patching to be completed. They have indicated that they were not able to remediate some areas due to proximity to electric poles and their building foundation. They are exploring alternate methods to address those areas.
2. Staff met with John Burns Construction regarding several of their open items at the train station. They have conceded that the grading on the hill is not per design causing water to freeze on the platform during late winter/ early spring. They will be relocating some plants and digging appropriate swales in the coming weeks. Coordination with the BNSF Railroad will have to occur as they will be working close to the tracks.
3. Staff met with our fence contractor to complete adjustments to some fencing at the Burlington Water Tower to make room for additional ComEd and AT&T equipment. They will also be installing some fencing adjacent to the train station.
4. In-house crews removed a number of dead limbs and several parkway tree. We are still awaiting a start date from our contractor for additional tree removals.
5. Crews hauled out construction spoils from our storage yard.
6. Crews performed their regular watering of newly planted flowers and landscaping.
7. Crews completed multiple repairs to water meter transmitters on houses throughout the Village.
